FACE

What is SPF?

SPF stands for 'sun protection factor', which is the amount of protection against sunburn it will provide. As the skin on the face is more sensitive, it's vital that you choose a high factor, and re-apply throughout the day.

Don't forget...
Try and avoid the sun at its hottest, and wear a hat and shades to protect delicate areas.

BODY LOTIONS

What is UVA / UVB?

It relates to the wavelengths of UV radiation from the sun. UVA is known to age the skin and UVB is what causes skin to burn.

Don't forget...
You can still get burnt on cloudy days. So, re-apply every 30 minutes, whether at home or abroad.
